Dear John,

I am writing to propose Laurent Chambaud as a candidate to be nominated for the Andrija Stampar Medal 2022.

I truly believe that he meets all the conditions to deserve this distinction. A long and recognized career in public health with responsibilities in different countries, an intense work in research and training of public health professionals, also reflected in leading one of the great international schools, a humanist vision of public health and, in particular, a persistent and consistent work on behalf of ASPHER and APHEA, sometimes in times of difficult decisions.

In addition, he is an affable personality, who shares his experience and enthusiasm with the most diverse members of the Association, who promotes bridges between institutions and people, thus consolidating a style of leadership that has enormously benefited everyone at ASPHER.

Best wishes,

Henrique
