Vision

To make the Department of Community Medicine & School of Public Health (DCM &SPH), a Global Centre of Excellence and be amongst the top 10 Public Health Departments globally.

Mission

To develop leaders in Community Medicine and Public Health, generate evidence for influencing World Health Policy, Planning, and Implementation, empower every individual and organization who deliver healthcare or contribute to determinants of health to meet the national goals, objectives, and targets for their respective jurisdiction and bring the transformative changes at the structural levels to impact community health.

Strategies

Vision and Mission shall be achieved through following strategies:

1. **Undertake Basic and Advanced Courses**, fellowships, workshops and seminars to build capacity of Community Physicians and Public Health Professionals.
2. **Build networks with the global leading public health institutes** for faculty and student exchange programs.
3. **Innovate to keep the curriculum aligned** to changing National Health Policy, public health needs and resources, and use wide range of pedagogy and skill labs for skill enhancement in all domains.
4. **Develop and demonstrate effective innovative models** of comprehensive primary health care that are
 - a. Aligned to national health priorities,
 - b. **Technology enabled and Artificial Intelligence based**
 - c. Community centric with community engagement to develop equitable, affordable and acceptable service delivery model with better access.
5. **Build local, national and international collaborations** and develop multidisciplinary teams to
 - a. formulate, test, and adopt the evidence using multidisciplinary research and develop innovative solutions to the community health problems.
 - b. **Develop point of care laboratory tests** to meet the national public health needs
6. Assist the state and union governments in the health planning, execution and evaluation of public health programs and intervention
7. **To undertake translational research**, convert evidence to policy and implementation and do advocacy at all levels.

We Invite All :

- ❖ **To Collaborate**
- ❖ **Participate**
- ❖ **Innovate**

For Better Public Health Across Globe

Thank You
